

## Logistics

# Automate Your Fuel Planning, Sourcing and Dispatching Process

### ADD VALUE TO YOUR BUSINESS

- Optimize inventory levels leveraging tank and delivery information
- Reduce below-ground working capital by lowering average inventory and safety stock levels
- Get the best price for every gallon purchased
- Schedule deliveries strategically to prevent retains and run-outs, fulfill carrier obligations, and take advantage of market/arbitrage conditions and maximize fuel margins

## Reduce Fuel Management Costs

### Planning Module

- Optimize replenishment timing and amounts
- Exception-based variance processing
- Customizable site rules for fuel inventory management

### Sourcing Module

- Automated purchasing processes
- Tracking and management of fuel purchases
- Automated fuel sales order processes
- Contract management and sourcing cost management
- Lowest cost motor fuel sourcing

### Dispatching Module

- Delivery prioritization
- Market/arbitrage views
- Integrated with Insite360 Delivery
